

To Whom It May Concern,

I had the great pleasure of working with Andrii Plakhotin in the Ukrainian software development company "Developex" for the period from January 2022 to July 2022. I was one of those who interviewed Andrii for the role of UI/UX designer in the company. He was hired to work on one of the company's largest and most complex projects, which was very important and successful.

During the course of his work, Andrii has demonstrated strong skills in user interface design, user experience, product design, and extraordinary attention to detail. Thinking about end-users and feeling modern UI trends Andrii has created number of excellent solutions for desktop and mobile platforms, graphic concepts, and iconography, offering many fresh approaches to solving problems of varying complexity. Andrii could always figure out how to implement complicated or non-standard functionality in the most convenient way, using an elegant and clean design.

Speaking about soft skills, Andrii is a very calm and responsible person with a proactive approach to work, always ready for both new challenges and routine tasks. He successfully participated in team meetings and always knew how to explain his point of view. During my work with Andrii, I cannot remember even one day when he was late or was not ready for work.

I have enjoyed the time we spent working together with Andrii Plakhotin and I highly recommend him for the position of UI/UX designer.

Sincerely,

Oleksiy Sinyaschok

Director of Design
